# ALTERNATOR MOUNT 40-220L

Small Block Chevy - Long Waterpump  
Driver Side

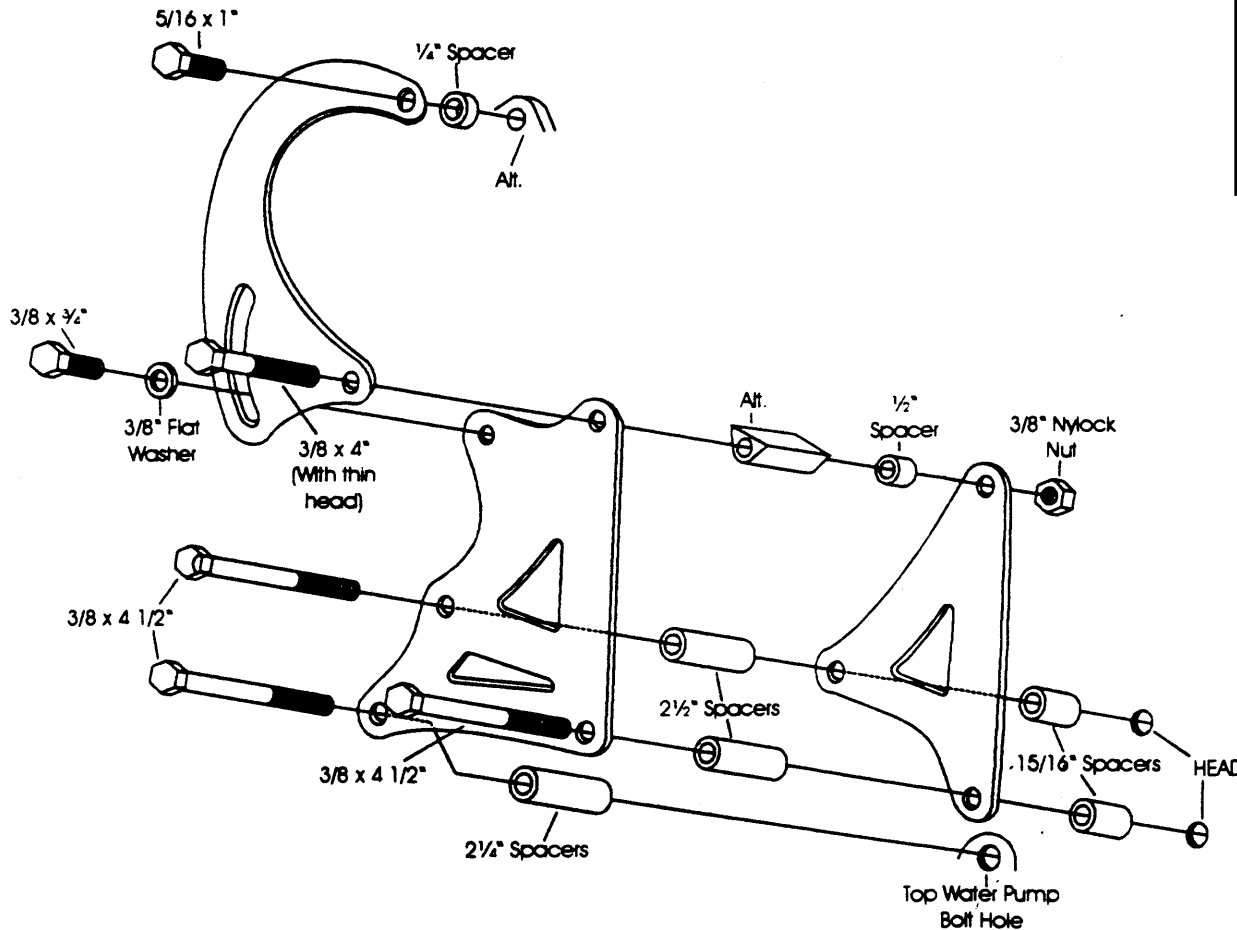

Diagram 1

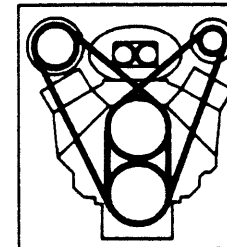

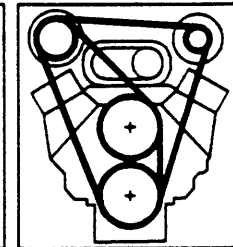

Diagram 2

When using both A.C. and Alt. Brackets, belts can be run either of two ways - as shown. They will require the use of 2 groove crank and water pump pulleys. Routing the belts as shown in Diagram 2 - will allow clearance for small blowers and extra room for T.P.I. air cleaners. The long belt will be approximately 71-72."

We use a belt length of 55 1/2 to 58" with this mount on installations in our shop. However; this can vary with the diameter of your pulleys.

**As with any part of this nature, make sure it fits your application before painting or plating. Parts that have been painted, plated, or modified may not be returned.**
